Every 5 days in Arizona, A BABY SUFFOCATES while sleeping.

DON'T

- Share a bed with a baby
- Put them to sleep in a cluttered crib
- Put them to sleep on their side or on their stomach
- Leave them on surfaces unsafe for sleeping, like couches and chairs

DO

- Share your room, not your bed
- Use firm sleep surfaces, such as a mattress in a safe crib
- Place babies on their back every time – at night and for naps
- Give babies space to breathe – no pillows, bumpers, blankets, or toys in the crib or bassinet
